

Our Quality Policy

We are committed to facilitate research within micro- and nanotechnology of excellent quality.

Provide access to state-of-the-art research equipment and infrastructure in an efficient and safe manner.

Ensure that the equipment and infrastructure hold a high standard and are available, operational and calibrated.

Ensure that we have the competence, capability and capacity necessary to give courses and training of high quality and continuous support to our users.

Adopt a user-first approach and being dedicated to understanding user present and future needs and expectations.

Work towards a safe working environment by having HSE as a foundation in all our activities.

Focus on continuous improvement to enhance our service quality and user experience.
