

Buddy rules in NTNU NanoLab's cleanroom

For work with chemicals at all times

Check which color code the chemicals have in either SDS folders in the cleanroom or on ECOonline. If a buddy is needed, it is your responsibility to find one.

A buddy...

- Must be in the same area as you when you work with the chemical
- Must be told by you what to do in case of a spill or an accident
- Have cleanroom training

Violations

Violation of the buddy rule system is serious. In repeated or severe cases, suspension from the cleanroom is a possible consequence.
